N73-33313

Dear Sir,

CSCL 08H G3/13 Unclass
01160

Reg.: Project Hydrology - No. Fo 418 - ERTS.

We have been delayed in our work with analyzing ERTS-data, but we are now picking up
and are doing well.

Our new I²s Addcol Viewer has arrived and is a good help.

But the most important point is that we are very happy about the ERTS-images we have
received this summer.

Last spring we thought we had to discontinue our work due to the difficulties experienced
with the tape-recorder. This seems to have been overcome and we are very happy to be
able to inform you that we have received many images this summer covering the most
interesting areas with a high technical quality and which have proved very valuable in our
work.

As soon as the material has been further analyzed it will be presented in a new report.

So in short we are very happy about the material received and hope for continued good
coverage this fall.

Sincerely yours

H. Odgaard
